About Us

It is formed on 19th April 2011 and was named as punjaab future. it is not named after Punjab state But 5 rivers PUNJ-AAB (Jhelum, Chenab , Satluj, Ravi and Beas). We formed this society because we always want to do something for our society. Our missions (Female Foeticide, Girl Education, Awareness for Aids, Blood Donation, Save Environment, Save Water, Say no to Drugs). We started this mission on the medium we all youth are familiar with .i.e. face book we made friends from different parts of our country and within 6 months we achieved a good amount of feedback from all of our friends from different parts of society but one day when we asked one of our new joiners from West Bengal to like the page then She rejected and asked " Why should i like it..?? " it is regarding your state then we told that it is not our state it about rivers like rivers flow all through without difference for anyone our organisation also flows in the same way it's welfare for society then she asked " Why not Kolkata future..?? " then after 15-20 days of work and discussions among the members about this thing we changed its name to YOUTH INDIA FUTURE then after sometime one more friend from Karnataka, who had joined us on facebook asked us to make pages of all over India then we members of our society had a meeting in our head office and decided to launch pages of all states then on 31st December 2011. We completed our work and made the thought into progress and implemented it successfully.

After gaining good response on facebook we decided to make it more professional and within your reach then we hired a professional website designer and made a website of our society. Our missions are well thought and main problems which we think were in the society are taken as our mission our website www.youthindiafuture.com was launched on 12th april 2012. We have believe to form a society which will not have these problems which we have mentioned in our website please see and join and help us in this social cause.

Just join and work for society.

ABOUT

Girl Education

In India normally people are seen saying equal rights for men and women but is it there anywhere? Education is very useful for getting a knowledge of outside world what is happening in the world. It helps us in getting awareness and information that we don't have we must get it without any discrimination on the basis of gender, caste, creed, religion etc. Girl need education so that they can work in every field of work to get jobs and work for progress of our country. It is well said 'education can make a person an extraordinary person. Girl education is really necessary because they are the one who have to take care of whole family at least two families and if one girl will study they can use their knowledge in the welfare of their parents family as well as in-laws. Girls are really important part of our community if they are educated they can make our children educated. Girls are given some reservation in some fields by government which also encourages them to do work. In today's world where there is hyper inflation only one person working cannot survive so if both husband and wife will work and earn money then it will be really useful and they can live happy family ever. Girls are up coming in every sector of work education but the need of hour is to encourage those who are not allowed for getting education or higher education.

We must come and join hands for the betterment of this social issue and help us in spreading information about the good effects society will have of girl education.

GIRL EDUCATION

Female Foeticide

Female foeticide is an offence which is most common these days. It literally means preference of male child to female child. If this practice continues then one day there will be no one in this world, because there will be no mothers in this world and no sisters and without mothers no one else has powers to produce babies and one day the world will have to vanish. Girls in our culture are recognised as goddess and goddess is supreme power in this universe who has created this universe and of course goddess has given a power of new babies to women because they can bear huge pain in every aspect of life. They can bear pain of dowry, restrictions, leaving one family and settling to another family, following family of parents as well as in laws in their own way, last but most important physical pain which no one can else feel or realise other than a mother. They bear so much for giving a new birth to an individual but whenever they come into this world they are killed like not needed persons in the world.

There is a famous saying that a man is a son till he marries but a girl is girl till she dies. That tells the love for their parents the girl child has. We must take some steps for encouraging the girl child birth if we can otherwise the day is not far away when we will be having nothing left over in this world. Mothers are very near to every child we never think of before killing the girl child that one day she will be mother like we all have. The ratio of female to male is decreasing day by day. The sex-ratio is 933/1000 of India. It is really an important issue which must be seen in India.

Please save girl child as without them there will be nothing in this world left no one.

FEMALE FOETICIDE

Say NO To Drugs

In India normally people are seen saying equal rights for men and women but is it there anywhere? Education is very useful for getting a knowledge of outside world what is happening in the world. It helps us in getting awareness and information that we don't have we must get it without any discrimination on the basis of gender, caste, creed, religion etc. Girl need education so that they can work in every field of work to get jobs and work for progress of our country. It is well said 'education can make a person an extraordinary person. Girl education is really necessary because they are the one who have to take care of whole family at least two families and if one girl will study they can use their knowledge in the welfare of their parents' family as well as in-laws. Girls are really important part of our community if they are educated they can make our children educated. Girls are given some reservation in some fields by government which also encourages them to do work. In today's world where there is hyper inflation only one person working cannot survive so if both husband and wife will work and earn money then it will be really useful and they can live happy family ever. Girls are up coming in every sector of work education but the need of hour is to encourage those who are not allowed for getting education or higher education.

We must come and join hands for the betterment of this social issue and help us in spreading information about the good effects society will have of girl education.

BLOOD DONATION

Say No To Aids

Aids (Acquired immune deficiency syndrome) it is the disease which is increasing its strength in India day by day aids patients are increasing in India more then 2.4 million people are currently living with aids problem. In India there were no aids patients till 1986 but in the world there were more then 20,000 cases of aids discovered. In 1987 it spread its roots from Tamil Nadu Chennai (one sex-worker got this disease from the foreign visitors). Many programmes were launched for providing information about this disease and it's symptoms. How it is spread so that everyone has proper knowledge what to do and what not. Awareness programmes were launched by government as well as some societies for spreading awareness that how can a person get aids so not to deal in those practises. What should we do and what not were also told in these programmes. We have also prepared a list of things like this so that we can spread proper awareness among the people that what should be done and what not these are as under.

- » Don't do sex with more then one partner, if want to do just use condom.
- » Don't use same needle for injecting.
- » Don't use drugs for injecting with same needle.
- » Blade must be changed after shave
- » Don't indulge in sex with any sex-workers

These things must be taken care off for protection of aids. As t is well said, "prevention is better then cure" so we must see towards its prevention because it does not have cure. Save our people from getting this virus. Save them save society. We want you all to come and spread awareness among youth not to deal with unfair practices of sex to protect our society's future.

Youth is future so let's take an oath to save them and spread awareness about this incurable disease and save our people.
